

YEAR 5: ART

A few weeks ago we asked you to label parts of a plant or flower.

Our Art for this week is linked to Science.

Choose a flower, plant or tree to draw.

Choose tools to use – You may want to start with pencil and add colour or you may want to use pen or even your iPad on the drawing app.

I would like you to consider the following:

- **Perspective:** Are all the branches / flowers the right size?
- **Sketching:** Have you thought about the brushstrokes of your pencil?
- **Detail:** Have you look closely at your item: What is the texture? Can you see that on your drawing?
- **Colour:** Have you thought about the different shades of each colour? How many shades of green are there in your plant or flower? Do you want to add colour or leave it as a pencil sketch?
